

New Texas-based ridesharing app believes in profit sharing, too.

In fact, you can earn residual income from the Drivers within your network!

Pick™ isn't just revolutionizing the transportation industry but the entire gig economy. Instead of investing in expensive marketing firms to help us build our business, we want to pay you directly.

Recruit Drivers and make money off of every ride they complete for as long as they drive with Pick™. You can also recruit other IBOs and earn on every Driver they recruit down to five levels!

WHY PICK™?

The only ridesharing service where Riders can choose their Drivers.

Ability to save favorites and be matched with them again.

Our exclusive consumer-choice model incentivizes Drivers to provide best-in-class experiences.

Pick™ is the only ridesharing service that allows users to *decide before they ride™* and for you to become an Independent Business Owner, too.

This exclusive choice model will create massive Rider interest - and loyalty. It's a huge opportunity for you to make money.

Pick™ is disrupting the industry with proprietary matching technology that allows Riders to view and select their Drivers (not just be randomly assigned). Be one of the first to join this innovative game-changer as a Pick™ Independent Business Owner (IBO).

If you have the drive to succeed, become a Pick™ IBO now, before the app officially launches.

You'll then be able to recruit Drivers and make money off of every drive they complete, month after month, year after year, for as long as they drive with Pick™. You can also recruit other IBOs and earn on every Driver they recruit down to five levels!

Pick™ will be launching in just a couple months. Get in on the ground level of a massive opportunity.
